

AURARIA CAMPUS PARKING GARAGE RETROFIT

This parking garage located on the campus of Auraria Higher Education in Denver, CO was retrofitted using the Neptun circline retrofit kit.

The existing parking garage fixture consisted of a 175W Metal Halide bulb and was retrofitted using an 80W induction bulb. Actual energy readings taken at the parking garage before and after showed a total reduction of 123W per fixture. The end result was an annual energy savings of \$96 per fixture on a 24 hour run time.
